

**Pure Air,  
Perfect Design:  
Falmec Kitchen  
Ventilation**

**falmec**

“Falmec has been at the forefront of kitchen innovation for over 40 years, blending our family business heritage with Italy’s finest manufacturing traditions. We’re committed to redefining cooking and kitchen design, bringing unmatched quality, advanced technology, and sustainable practices to every home.”

– Lorenzo Poser, VP of Sales & Marketing, Falmec

# Discovery. Passion. Excellence.

## *Italian Craftsmanship, Modern Innovation*

Falmec products are designed and manufactured in Vittorio Veneto, near Venice, Italy, a region known as the “stainless steel valley,” where traditional craftsmanship meets cutting-edge steel technology. Falmec combines artisanal techniques with advanced industrial processes to create products that are not only functional but also beautifully designed. Every detail is meticulously crafted, reflecting Italy’s unparalleled commitment to quality and innovation.

# Noise Reduction System (NRS)

## *The Power of Silence*

Falmec's hoods, featuring the cutting-edge Silence NRS technology, redefine luxury kitchen ventilation with unparalleled silence. This innovative system, developed in collaboration with leading fluid dynamics experts, significantly reduces noise, elevating your culinary space to new heights of serenity and performance.

Experience the perfect balance of superior suction power and an exceptionally quiet environment—enabling you to cook, converse, and immerse yourself in music without the distraction of traditional hood noise.

Silence NRS  
technology

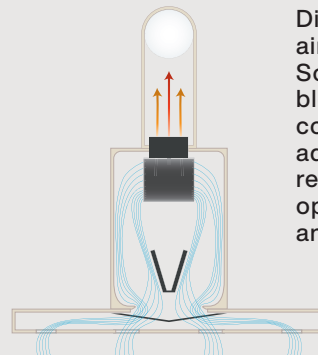

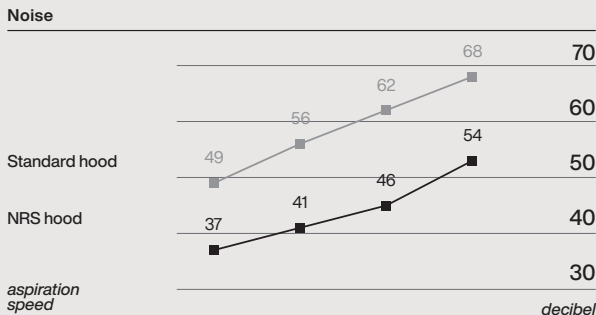

Diagram of internal airflow in an NRS hood. Soundproofing the blower chamber, combined with advanced airflow research, minimizes operating noise to an absolute minimum.

# Speed Reduction System (SRS)

## *Effortless Airflow Control*

With Falmec's Speed Reduction System (SRS), installers can easily set a hood's maximum airflow to meet local building codes. Available on select models, the SRS is adjustable in just three steps, providing a straightforward, permanent solution for code compliance.

# Circle.Tech Technology

## *The New Shape of Filtration*

Unlike conventional hoods, Circle.Tech filtering units extract air horizontally rather than vertically.

The air moves through a Carbon.Zeo-powered filter surrounding the motor, ensuring efficient and even distribution. Its circular design increases the filtering surface, enhancing suction, filtration, and noise reduction.

### *Carbon.Zeo Filter Technology*

The Carbon.Zeo filter, made from the highest quality natural materials including active carbon and zeolite, a rare volcanic mineral known for its microporous structure, offers unparalleled efficiency in absorbing odors and fumes, enhancing your kitchen with luxury and purity.

Engineered for durability, this filter lasts a minimum of 3 years, with up to 5 years of performance, and can be regenerated every 18 months for peak efficiency.
